WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1905.

LETTER OF TRANSMITTAL.

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., December 31, 1904.

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products for the year ending June 30, 1903, with those for two previous years added for comparison, derived from the Bureau of Statistics of the Department of Commerce and Labor, the work having been done by the Division of Foreign Markets, under the direction of its chief, Mr. George K. Holmes.

This compilation is a continuation of a series of bulletins pertaining to the same subject, but it is more condensed than previous issues owing to the exclusion of unimportant details. It is desired for the use of this Department and to meet the demands of a large number of correspondents, as it contains an arrangement of the statistics and a determination of totals, with various comparisons, that are not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin No. 31 of this Bureau.

Very respectfully,

JOHN HYDE,
Chief of Bureau.

HON. JAMES WILSON,
Secretary of Agriculture.

EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a customs-house.

IMPORTS FOR CONSUMPTION.—Goods which have passed from the control of customs officers into domestic trade in this country.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, unchanged by manufacture.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country which are shipped to foreign countries.

TRANSIT, IN TRANSIT, OR TRANSSHIPMENT TRADE.—Goods passing through a country from one foreign country to another. This trade of the United States is reported separately and is not included in imports or exports.

CONSIGNED.—The country of consignment is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be forwarded. The customs regulations are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. * * * Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to *ad valorem* duties are regulated by the act of Congress of June 10, 1890:

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is determined in the same manner as the value of imports subject to *ad valorem* duties.

The value of domestic exports is their value at the time of exportation in the ports of the United States whence they are exported.

The value of foreign exports when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as for domestic exports.

Goods in transit through the United States from one foreign country to another are valued in the same manner as imports.

Valuation deceptions.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than other imports, with specific duties or free, and exported articles; the

valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement, and the valuations of imports that are free of duty are often inflated for the purpose of trade deception.

DISCREPANCIES IN FOREIGN TRADE STATISTICS of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not include c. i. f. charges (cost, insurance, freight) in the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes cost of delivery.

The United States trade returns include the free zones of Hamburg and Bremen in Germany, while the statistics of the German Empire do not.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade between the United States and any noncontiguous possession, all other noncontiguous possessions except the Philippine Islands are included with the United States; thus, exports from Hawaii to Guam are included in the total exports from the United States to Guam.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

IMPORTS OF FARM AND FOREST PRODUCTS, 1901-1903.

RELATIVE DECLINE IN AGRICULTURAL AMOUNT.

During the six years, 1898-1903, there has been a gradual decline in the value of farm or agricultural products imported into the United States as compared with the value of all imports of merchandise. Table 1 gives farm products as 51 per cent of all imports in 1899 and only 44.5 per cent in 1903, a decline of 6.5 per cent. This relative loss is due to large gains in the value of imports other than farm products, the value of such imports for 1903 being nearly \$80,000,000 in excess of their value for 1902, and \$171,000,000 more than their average annual value for 1898-1902, while the gain of the imports of farm products in 1903 over 1902 was about \$42,000,000 and over the annual average for 1898-1902 nearly \$77,000,000. The imports of farm products have increased in six years only about one-half as much as imports of other merchandise.

TABLE 1.—*Value of IMPORTS of FARM products, 1890-1903, and comparison with total imports.*

GAIN IN FOREST PRODUCTS.

In the imports of forest products for 1893-1903, as shown in Table 2, the values remained in the neighborhood of \$45,000,000 until 1899, when there was a gain of \$8,000,000, followed the next year by another gain of \$7,000,000 and in 1903 by an increase of \$11,000,000 more, making a total gain of \$26,000,000 in five years.

CONTRIBUTIONS FROM THE VARIOUS CONTINENTS.

Table 3 shows an increase in our imports of farm products from Asia and Oceania, from \$85,000,000 in 1901 to \$113,000,000 in 1903, a gain of 33 per cent, while in the same time the forest products gained \$3,000,000 or 50 per cent. The gain in imports from all sources for the same time was 16 per cent for farm and 25 per cent for forest products. In our imports from South America from 1901 to 1903 there was a decline of \$11,000,000 in farm products and an increase of less than one-half million dollars in forest products.

TABLE 3.—*Value of IMPORTS of FARM and FOREST products, 1901-1903, by grand divisions.***FARM PRODUCTS.**

COMPARATIVE STANDING OF ALL COUNTRIES.

Attention is called in Table 4 to the decline in imports of farm products from Austria-Hungary and all of Central Europe north of Switzerland, including Germany, Netherlands, Belgium, Denmark, Norway and Sweden, and to the increase from nearly all the other countries of Europe, especially Italy, France, and the United Kingdom. The imports from Austria-Hungary declined \$2,000,000 and from Germany more than \$10,000,000 from 1901 to 1903. The total gain from Italy, France, and the United Kingdom was \$21,000,000, and the gains and losses for all Europe give a net increase of \$14,000,000. (See Table 3.)

The imports from Cuba and Japan gained \$29,000,000 from 1901 to 1903, while the increase in imports from all other countries—more than 80 in all—was \$35,000,000. In 1903 Japan almost equaled the United Kingdom as a source of supply for farm products. The countries named in Table 4 and throughout this bulletin as countries from which goods are consigned, are not necessarily the countries in which the goods were produced. The United Kingdom, which imports and reexports large quantities of articles produced in other countries, occupies an important place in the tables of this bulletin.

a Not stated separately.*b* No longer included in the returns of foreign trade.**FOREST-PRODUCT IMPORTS, BY COUNTRIES.**

Of the increase of \$12,000,000 in imports of forest products from 1902 to 1903, \$10,000,000 came from Canada, Brazil, United Kingdom, British East Indies, Belgium, and Germany, while the gains and losses in the imports from 56 other countries gave a net gain of \$2,000,000. These imports from Canada increased \$4,000,000 from 1901 to 1902 and \$2,000,000 during the succeeding year, making a total gain of \$6,000,000, or 51 per cent in two years. A gain, smaller in absolute value, but relatively much larger, came from Sweden and Norway. Our imports of forest products from these two countries

amounted to over \$300,000 in 1901 and nearly \$900,000 in 1903, the gain being 158 per cent.

The varied nature of the imported forest products is suggested by the four leading countries of origin as given in Table 5, only one of which—Canada—may be regarded as an important competitor of the United States in the lumber industry.

PROMINENT CLASSES OF IMPORTS.

The imports of raw silk, according to Table 6, increased \$20,000,000, or 66 per cent, from 1901 to 1903, while wool increased nearly \$10,000,000, or 77 per cent, in the same time. In both cases 1902 showed a gain over 1901, and 1903 over 1902. Vegetable fibers increased \$16,000,000, or over 50 per cent, from 1901 to 1903. The imports of hair, another raw material for textile goods, gained over \$1,000,000 from 1901 to 1903. The coffee trade experienced two marked changes, an increase of \$8,000,000 in 1902, followed in 1903 by a decline of nearly \$12,000,000. In spite of a gain of \$17,000,000 over the previous year, the imports of sugar and molasses in 1903 were still \$18,000,000 less than in 1901.

The lumber imports have grown from \$9,000,000 in 1901 to \$14,000,000 in 1903, and the imports of wood pulp more than doubled in the same time.

NONCONTIGUOUS POSSESSIONS.

Sugar was the most important farm product imported from Hawaii and Porto Rico during 1901-1903, and manila hemp formed 97 per cent of the farm imports from the Philippine Islands in 1903. Detailed statements of the trade of the United States with these islands and also Alaska, Guam, and Tutuila, may be found in the bulletin, issued by this Bureau, entitled "Trade with Noncontiguous Possessions in Farm and Forest Products, 1901-1903."

**PUBLICATIONS OF THE BUREAU OF STATISTICS PREPARED BY
THE DIVISION OF FOREIGN MARKETS.**

On July 1, 1903, the Division of Foreign Markets was transferred to the Bureau of Statistics; since that date the following publications, prepared by the Division of Foreign Markets, have appeared in the series of the Bureau of Statistics:

BULLETINS.

- No. 27.—Wheat Production and Farm Life in Argentina. Price, 10 cents.
- No. 29.—Methods and Routes for Exporting Farm Products.
- No. 30.—International Sugar Situation.
- No. 31.—Imports of Farm and Forest Products, 1901-1903.
- No. 32.—Exports of Farm and Forest Products, 1901-1903.
- No. 33.—Trade with Noncontiguous Possessions in Farm and Forest Products, 1901-1903.

CIRCULARS.

- No. 15.—Foreign Trade in Farm and Forest Products, 1903.
- No. 16.—Foreign Trade in Farm and Forest Products, 1904.
